WHY CHOOSE CREWSAVER

BUOYANCY AIDS

Evolution in Buoyancy Aid Technology

A large percentage of the boating world still do not wear any kind of personal flotation device. As a manufacturer of performance safety equipment our challenge is to reduce this number through the design of comfortable and stylish buoyancy aids suitable for a multitude of watersports activities.

We offer a full range of products to suit your on water safety needs.

Pictured to the right is our flagship product, the Pro 50N EX. Fitted with multiple accessory mount loops and a dedicated knife pocket for safety, this customisable buoyancy aid is ideal for instructors and recreational users.

What is a buoyancy aid and do you need one?

A buoyancy aid, often called a personal flotation device (PFD), is easy to swim in. It helps keep you safe by providing an extra bit of buoyancy when in the water. If you're doing any sport which involves you being in and out of the water, then it is highly recommended you wear a buoyancy aid.

Breathable Airmesh technology for improved heat management

Stretch to fit shoulders and side twin adjustment for the perfect fit

Extra large storage pocket ideal for keys - and more importantly your snacks

Low profile sculpted design constructed from supersoft foam for your comfort

Dedicated knife pocket and accessory attachment points

Internal Grip Strips to prevent garment ride up

Buoyancy aid in focus: The Pro 50N EX

Experience

- We have been designing buoyancy aids with you in mind for over 60 years. We can say with pride, we are now recognised as one of the foremost manufacturers of performance safety equipment in the world!
- Our very clever designers (don't tell them we said this) specialise in flotation technology, we work closely with high performance sailors, lifeboat crews and even helicopter aircrew. So whether it's a lifejacket for the Royal National Lifeboat Institution (RNLI) or a buoyancy aid for a day out on your paddleboard or high performance sailing dinghy, we provide the safety equipment so you can focus on getting out there and doing what you (and we!) love.

Safer by Design

- Our unique Fusion 3D technology uses lightweight contoured foam to create the most comfortable buoyancy aids available. Combined with our designed-to-fit ethos, our buoyancy aids are adaptable to a spectrum of sizes, whilst maintaining a safe and secure fit with minimal snag risk.
- Look out for our buoyancy aids which include easily accessible expandable pockets. These can be used to store your phone should you need in an emergency. Just remember to pop it in a waterproof pouch first.
- Top tip! Add a whistle to your buoyancy aid so you have an additional way to attract attention

IF IT INVOLVES A BUOYANCY AID, MY ANSWER IS YES!

We know you don't need to be asked twice to spend the day on (or in!) the water. Whether you're an experienced watersport enthusiast - or a tentative toe dipper - we have a buoyancy aid to suit.

Our buoyancy aid range helps manage your safety, letting you focus on what you love. So say yes and embrace every opportunity to get on the water. After all, adventure favours the bold!
