MAROPS XTP 290N ASSAULT TROOP LIFEJACKET

Readily tailored to suit assault troop operations

Designed around amphibious operations, the XTP is an ideal solution to fit around heavy kit that may be worn or carried. The lightweight but heavy-duty lifejacket is a low-profile design, keeping the wearer unrestricted and comfortable. Once inflated, the bladder with retro-reflective tape is distinctive to aid location and rescue.

BENEFITS:

- ✓ Cut away at the shoulders to minimize interference with weapons and movement
- ✓ Flattened back panel stops interference with the helmet, even in the prone position
- ✓ Achieves ISO 12402-2 in water performance with 290N of buoyancy
- ✓ Best in class Ergo 3D bladder inside
- ✓ Adjustable straps allow it to easily fit around body armour
- ✓ Easy to fit and remove with different crotch strap options
- ✓ Covert patches on the bladder to disguise light and reflective patches where required

“ Assault troop operatives can move with agility and precision without compromising on safety ”
