ADVENTURE  
UNLEASHED**

# WHY CHOOSE YAK

## EXPERT DESIGN

Yak's expert designers work closely with a wide range of organisations and individuals including flood rescue teams, ocean rowers and whitewater hunters. With their unique insight we are able, step by step, to refine every aspect of our product design and construction. We feed these innovations directly into each of our products whether for whitewater, touring or recreational use. So, no matter what floats your boat - your safety is never compromised.

# MATERIALS AND FABRIC

We choose the best and most appropriate materials for each product, ensuring the ultimate in comfort and longevity for the individual environment. We then combine our in-depth know-how with the latest technology to construct quality products which offer you the best possible performance.

SANTIAM DX20K

## PROVIDING CRITICAL SAFETY SOLUTIONS

Survitec is recognised as the most comprehensive global total solutions provider for mission critical safety and survival equipment. With a history dating back over 160 years, Survitec commands market-leading positions worldwide in marine, offshore, defence & aviation survival technology.

As innovators with a passion for developing new products and services to meet the changing demands of our customers, we pride ourselves on delivering great service.

Although our business interests span many countries and markets, our people share a common mission... your safety.

As part of Survitec, the Yak team are experts at discretely combining safety with practicality and style.

 **survitec**

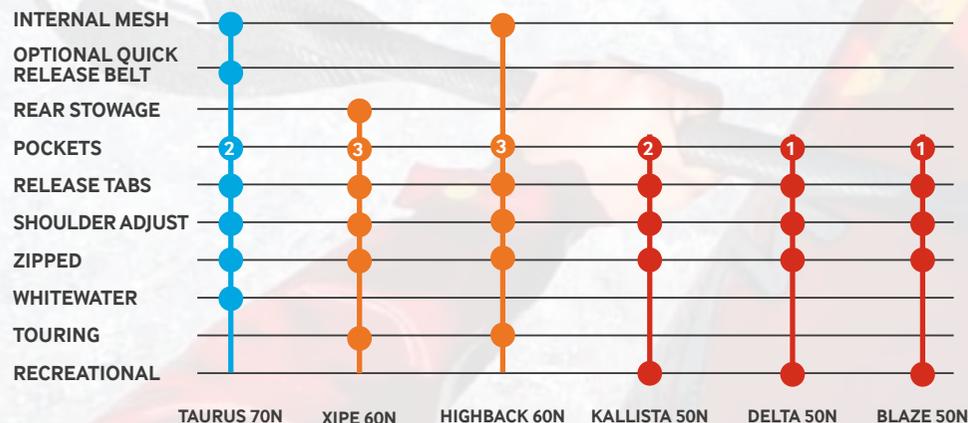

# PERSONAL FLOTATION DEVICES (PFDs)

When developing our PFD range our specialist design team were tasked with drawing on their huge amount of technical knowledge to produce a range of products that fitted the specific needs of each intended user.

The team have studied all the movements you do, the shapes and sizes you are and the features you want and need.

The result is a coherent collection that caters for everyone, from the first-time paddler, through to the whitewater guru, without being confusing and overly complicated. Add to that some killer price points that offer excellent value, what's not to like.

## RANGE FEATURES

## 4D CAST TECHNOLOGY

Extensive research and development sees the integration of 4D Cast foam technology, providing full freedom of movement for performance paddling. We have precision distributed the buoyancy to provide a sleek, slim-line high performance product.

# TAURUS 70N GEN 2

Given the Yak design team's background in making PFDs for the harshest environments on the planet, and highly demanding users, why not produce a whitewater PFD that incorporates the lessons learned during those technical projects and offers their benefits for the best possible product at the best possible price. Enter the new Yak Taurus Gen 2, with it's updated pocket configuration.

The Taurus takes comfort and freedom in a whitewater PFD to a whole new level. Its 3D shaped front panels literally wrap around the body like a warm caress, and the minimalist back panel... well, you won't even know it's there! Plus, the Taurus has an integrated attachment point to facilitate the use of the Yak quick release belt – a useful tool, should you need to conduct a bankside rescue.

## FEATURES

- ✓ 4D Cast technology combined with Supersoft foam to offer supreme wearer comfort
- ✓ Heavy duty outer cover material to improve wear characteristics and product longevity
- ✓ Optional quick release harness belt, which can be worn right or left handed
- ✓ Enclosed rear panel to give cleanest harness attachment point
- ✓ Versatile front pocket, which is big enough to take the essentials
- ✓ Separate knife pocket to speed deployment
- ✓ External mounting points with lash tab spacing to easily accept accessories
- ✓ Stretch mesh side and inner panels improve drainage
- ✓ Internal waist adjustment reduces overall product height
- ✓ Padded shoulder adjustment to allow a wide size range adjustment
- ✓ Shoulder grip panels to aid boat carrying

SIZES: S/M, M/L, XL

### ADJUST TO FIT

Yak multi-point adjustments let you quickly tailor your jacket snugly to your body shape. The failsafe, adjustable shoulder straps give the right fit whether you're a long, lean string bean or a shorter, rounder baked bean.

### POCKETS

When you're heading out into the wild, never underestimate the value of good communications between yourself and your party, and with the wider outside world. With a new internal phone pocket, and increased volume main pocket, we have your communication (and selfie!) and rescue kit storage needs covered.

### ATTACH IT HERE

Not that you want to go off for long adventure days afloat weighed down like a pack horse, but some accessories are essential. We know that, we've been there. So we've added plenty of strong attachment points including a quick release split D-ring to which you can secure a carabiner or cowtail. Giddy up now.

### SAFETY FIRST

Approved to ISO Standards, all Yak buoyancy aids tick the box for fundamental safety and quality issues. But naturally, being a Yak product,, there's a whole lot more on offer too.

### IN SAFE STORAGE

You never know when you might need a knife when afloat, not to mention the other bits and pieces essential to your individual needs. All except our most basic jackets offer additional safety storage options, such as this quick access expanding knife pocket with lanyard attachment.

### SAFETY MANAGED, ADVENTURE UNLEASHED

Your safety is of paramount importance to us. So we have included the option to integrate a quick release belt into our Taurus whitewater PFD. With it in place you can remain confident of tackling whatever the water throws at you.

### SNUG AS...

You should be as snug as a bug in your PFD. A snug jacket is more comfortable and prevents the double trouble of chafing and constricted movement common with poorer fitting garments.

# XIPE 60N

River calm or choppy sea, the Xipe 60N is the perfect fit for touring without tiring. Its high cut slimline design, adjustable shoulders and dual side adjusters together ensure a great fit with excellent arm mobility. With a built-in hydration pack pocket and abundant front pockets, it's a comfortable, practical solution for every day paddling.

## FEATURES

- ✓ 3D ergonomic supersoft foam panels to offer greater wearer comfort
- ✓ Versatile front pockets for accessory stowage
- ✓ Hydration pack pocket with double ended zip to allow left or right hose exit
- ✓ Adjustable shoulders and twin waist adjustment for a close fit
- ✓ Reflective piping for visibility

**CODES:** ● 3710 (RED)  
● 3711 (BLUE)

**SIZES:** S/M, M/L, XL  
XXL only available in red

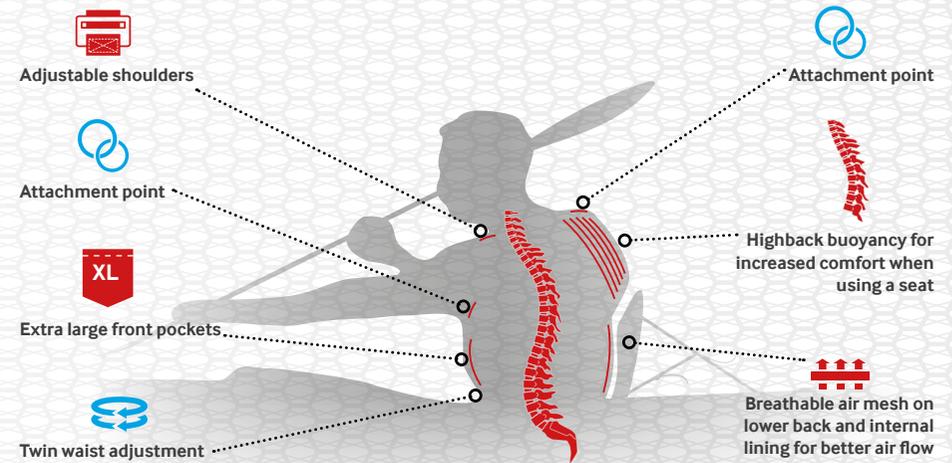

# HIGH BACK 60N

The ultimate PFD for your next touring adventure, the High Back 60N provides the most advanced solutions in comfort technology design. It's raised back profile buoyancy placement means that no matter what type of boat you are in, you can be assured of its comfort properties.

In addition, the High Back 60N provides breathable air mesh air flow technology helping you stay cool on even the warmest of days and a sculpted foam design helping to ensure the PFD moulds to the shape of your body to help ensure you are as fresh and comfortable when you arrive as when you set out.

## FEATURES

- ✓ 4D Cast technology to offer supreme wearer comfort
- ✓ Superlight foam
- ✓ Ergonomic high back profile for harmonised comfort between paddler and the boat seat
- ✓ Versatile front pockets for accessory stowage
- ✓ Breathable air mesh technology for temperature regulation
- ✓ Adjustable shoulders and twin waist for a close fit
- ✓ Available in 2 versatile sizes to accommodate a wide range of sizes

# KALLISTA 50N

The humble recreational PFD is often overlooked in the race to produce the newest/latest/greatest/most extreme product. However, it is at the recreational level that most people experience Paddlesports for the first time. So why not make the experience a better one, ensure comfort and security without breaking the bank.

Yak has completely redesigned the classic Kallista PFD. We have called upon our dedicated in-house design team and tasked them to use their huge expertise in the PFD market to improve on an already excellent product. Each element was reviewed in turn, improved where possible, and then the parts combined, and reviewed and improved again! The result of this process is the most comfortable and secure PFD Yak has ever made at this level.

## FEATURES

- ✓ Robust outer cover material to improve wear characteristics and product longevity
- ✓ Redesigned thinner, more flexible foam panels to offer greater wearer comfort
- ✓ Optimised foam construction to give best balance of comfort and light weight
- ✓ Fuss free front zip donning makes life simple and eliminates user confusion
- ✓ Buckle free front panel which removes the most common potential snag point
- ✓ Dual side adjustment to give the best possible fit and security in the water
- ✓ Padded shoulder adjustment to allow a wide size range adjustment
- ✓ Versatile front pocket, which is big enough to take the essentials (it's all about the gram!!)
- ✓ Secure in-seam key pocket, cunningly sitting between the foam to improve comfort
- ✓ Reflective highlights to improve low light visibility

# BRAND NEW LUGGAGE

Whether you need something to protect your kit from the elements, or keep the boot of your car dry and clean, we've got it covered ...literally!

## DRY PHONE POUCH

If you're looking to carry your phone, wallet, car key, and a few snacks, then the phone pouch is for you.

A sealable inner sleeve keeps your phone separate from everything else, offers it additional protection, and is sized to accommodate most smart phones. The crystal-clear outer panel allows full phone touch screen functionality and excellent front camera photo quality.

Belt loops on the rear give more attachment options, in addition to the detachable shoulder/waist strap. The opposing buckles allow the top to be rolled down and clipped to the sides, or back on to themselves, if you are in a hurry.

### FEATURES

- ✓ Inner phone sleeve for easy phone operation whilst in the pouch.
- ✓ Full touch screen functionality through clear outer panel
- ✓ Room for lots of snacks!
- ✓ Belt loops for more attachment options
- ✓ Removable shoulder/waist strap

## DRY PHONE CASE

Designed to accommodate most smart phones, the dual clamp system is easy to operate, even when wearing gloves. The edge 'air bumper'\* will protect against knocks, whilst the crystal-clear panels front and back allow full touch screen functionality, and excellent photo quality when the all important selfie beckons! Finished off with a quick release lanyard, the case is IPX8 rated for continuous submersion.

### FEATURES

- ✓ Easy clamp system keeps the water out
- ✓ Crystal clear panels allow full phone touch screen and camera functionality
- ✓ Edge 'Air Bumper' to offer added phone protection
- ✓ Quick release lanyard
- ✓ IPX8 rated for continuous submersion

## DRY WAIST BAG

If you're looking to carry the essentials, maybe even a packable jacket, whilst keeping your upper body free to move, then the waist bag is the perfect solution. Your phone is stored in the separate inner sleeve, which makes it easy to access and operate without having to remove it from the bag, and the crystal-clear outer panel is fully touch screen compatible and maintains excellent photo quality. Air mesh padding on the belt ensures superb comfort.

### FEATURES

- ✓ Inner phone sleeve for easy phone location and operation.
- ✓ Full touch screen functionality through clear outer panel
- ✓ Room for a packable jacket, first aid kit, or lots of snacks!
- ✓ ID-rings for more attachment options
- ✓ Air mesh inner waist band for improved comfort and durability

## LIGHTWEIGHT DRY BAG SET

Can't decide which size dry bag you need? This cost-effective set offers three sizes to carry your smaller items with ease. Made from a lightweight rip-stop nylon, they pack down to nothing when not in use, and are ideal for keeping your valuables dry in a non-waterproof bag, or just separating items for ease of location. The pack includes a 10 l, 5 l and 2 l bag, each in a different colour. They may be lightweight, but they're still IPX4 rated, which means that they will withstand splashes from any direction.

### FEATURES

- ✓ 10 l, 5 l and 2 l sizes included in pack
- ✓ Lightweight rip-stop nylon construction for durability
- ✓ Different colours to ease contents identification
- ✓ Pack very small when not in use

## DRY BAG WITH MOLLE SYSTEM

Constructed from heavyweight 500D PVC material, these dry bags are ready to meet your next adventure head on! The super durable material is complimented by the unique Molle slot system, which uses standard lash tab spacing to allow the easy addition of separate accessory packs, Velcro straps, carabiners, lights, or whatever takes your fancy. Light passing through the Molle slots also helps lighten the inside of the bag, to make it easier to find what you are looking for. A detachable swivel shoulder strap completes the package.

### FEATURES

- ✓ 20 l, 30 l or 40 l sizes cover most requirements
- ✓ Heavy duty 500D PVC construction for maximum durability
- ✓ Unique Molle system allows additional accessory attachment
- ✓ Detachable swivel shoulder strap for hands free carrying
- ✓ Used by Brendon Prince for his 8 Days at Sea SUP challenge

## DRY DECK BAG 20L

If you plan on spending some time in your boat, or on your board, this convenient deck bag will keep your kit secure, whilst offering excellent accessibility. The heavyweight 500D PVC construction will stand up to the worst punishment, whilst the fully adjustable straps have been sized to make sure they will reach securing points on even the widest kayaks or SUPs.

### FEATURES

- ✓ Roll top 20 litre main compartment keeps your essentials dry
- ✓ Optimised securing straps will fit the majority of kayaks and SUPs
- ✓ Quick access top pocket with water resistant zip, ideal for snacks or small accessories
- ✓ Adjustable elastic retaining system allows quick stowage of waterproof items
- ✓ Heavyweight 500D PVC construction for ultimate durability

## DRY HOLDALL

Constructed from durable 500D PVC material, the Dry Holdall range will keep all your kit dry in the most hostile of environments. Three generous sizes will accommodate everything that you need for your next expedition. The top opening design allows quick and easy access to specific contents. The large openings have partial hook and loop closure, to hold the edges together as quickly as possible, keeping the elements out. The traditional roll top design ensures that there are no zips to fail, whilst the end cinch straps and top securing straps ensure the bag will stay sealed, even when compressed.

### FEATURES

- ✓ 40 l, 60 l and 90 l size options for all your kit requirements
- ✓ 500D PVC construction for maximum durability
- ✓ Secure roll top design keeps contents dry
- ✓ Generous quick access outside pocket
- ✓ Padded handles and shoulder strap for comfort
- ✓ Used by Brendon Prince for his 8 Days at Sea SUP challenge

## DRY BACK PACK

Possibly the most versatile bag in the range, this heavy duty Back Pack is at home wherever your adventure takes you. The 30 litre main compartment will hold your wetsuit, towel, and food and leave your hands free for the walk/skate to the water. Chuck your laptop bag in it for your daily commute. Take everything that you need for a day of 'changeable' weather in the hills! We have paid special attention to the shoulder straps, which feature mesh fronts, vented foam inserts and air-mesh padding for maximum breathability. The rear panel features contoured back pads with mesh covers for breathability, as well as a central spine channel for comfort.

### FEATURES

- ✓ Heavy duty 500D PVC construction for maximum durability
- ✓ Technical shoulder straps for increased comfort and breathability
- ✓ Contoured back panel for comfort
- ✓ Chest and waist straps for improved stability
- ✓ Molle accessory attachment system for added versatility
- ✓ Generous quick access external pocket and convenient mesh side pockets
